

Dear potential business partners,

Our company SKYLEADER Aircraft currently search dealers, capable to sell our aircraft to end customers, flight school, aero clubs or government and tender purposes with our full sales strategy & marketing support to join our family of sale network.

Please try to answer yourself these questions first:

- Are you experienced in light aviation, do you have knowledge about competitors?
- Do you consider to invest full time work to this project?
- Are you able to import & certify aircraft at your local certification office and ensure the insurance and registration?
- What is your facility background (access to airfield, hangar possibilities, service shop, etc.)?
- Which territory you think you will be successful in?
- Are you in a position to purchase DEMO aircraft?
- What is your estimation of sales per year?
- Are you experienced in what will be your marketing and sales plans?

If your responses are positive and can be proveable, we are ready to continue our negotiations. Of course the own flight school is great start how to penetrate the market and we are able to support with staff training and mutual personal visit.

Looking forward to your reply & friendly remains,

SKYLEADER AIRCRAFT®
